

# Guide to New Trail Signs

As part of the implementation of an interim trail management strategy, the Village of Cumberland is installing signage in the Community Forest that provides new trail information.

For full details on the strategy please visit [cumberland.ca/cumberland-trail-network/](http://cumberland.ca/cumberland-trail-network/)

## NATURE TRAIL:

**“Best enjoyed on foot”**

Designed and maintained for foot traffic, Nature Trails provide opportunities for hiking and nature education. Mountain biking is not recommended.

## MULTI-USE TRAIL:

**“All users prepare to yield”**

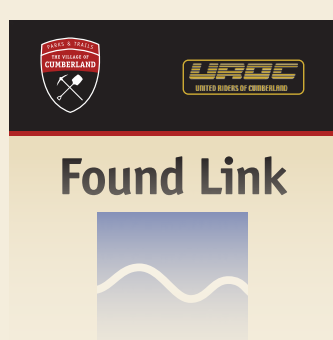

Multi-use trails are designated for non-exclusive use by hikers, runners, and bikers. All users should be prepared to yield to others.

## GRAVITY TRAIL:

**“Hikers yield to mountain bikers”**

Grades, alignments, and technical trail features may increase user speeds and impact response times. Foot traffic should yield to mountain bike traffic for safety reasons.

## SHARED MANAGEMENT TRAILS:

← Signs with both Village and United Riders of Cumberland logos cross a property boundary between Village owned land and private managed forest. Watch for new signs marking property boundaries.

## SINGLE MANAGEMENT TRAILS:

← Signs with one logo are managed entirely by a single trail manager.
