September 21, 2022

Upcoming Trail Works in Solport Park:

Please be advised that trail clearing, and construction will start the week of September 21, 2022. This work will continue intermittently over the coming weeks, with the goal of completing works by mid-October.

Construction will include use of chainsaws and other large machinery. Trails will be realigned to provide sustainable grades and will be made wider, with the goal of providing access for all non-motorized users. A new trail will also be built to provide a loop pathway through the park.

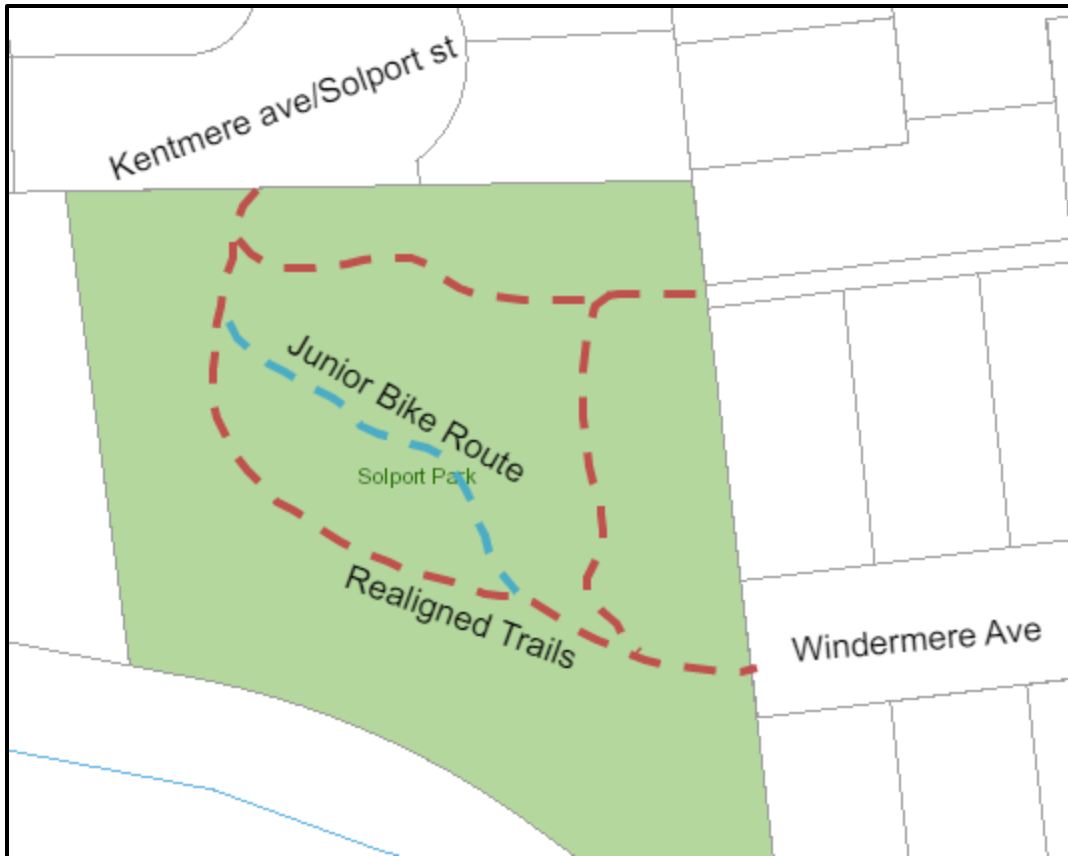

Trail closures through Solport Park may be in effect during active works and cautionary signs will be posted. Trail users are encouraged to use the Westwood and Egremont connectors off Solport Street as a detour during these times.

Trail enhancements were identified as a priority during a public outreach campaign in 2020 to determine future park projects. Information on Solport Park, including details on the park planning process can be accessed at: [Cumberland.ca/solportpark/](https://cumberland.ca/solportpark/)

Contest Announcement:

An existing trail will be revamped as a junior friendly bike route, and to celebrate these park enhancements we are holding a naming contest for this section of trail. The winning entry will have their trail name used on new park signs, and they will get to take a trail sign home. Contest open to residents aged 10 and under. When submitting an entry please use the subject line "*trail name contest*" and include your name, age, the street you live on, and your trail name idea. **Entries must be received by October 14th.**

Please submit your trail name idea to the Village office at info@cumberland.ca

Example of a standard Village trail sign.
