

CUMBERLAND

Wastewater Upgrades

NOTICE: CONSTRUCTION ON WASTEWATER UPGRADES SET TO BEGIN JUNE 26, 2023.

The Village of Cumberland's Wastewater Upgrades Project will be getting underway this month, with heavy construction on the project expected to be active for the next six months.

We are providing this notice to residents and businesses in the area to advise them of the start of work and expected impacts. It's anticipated that people in the area will notice:

Increased vehicle traffic at the entrance to the facility on Ulverston Road: Construction traffic will use the gravel portion of Ulverston Road and not the residential area.

Noise from construction, including truck beepers: Construction will be focused during workday hours - though some intermittent exceptions may occur.

Restricted access to site: Fencing has been installed to keep the public out of the construction area. An alternate trail to replace the road access route was completed in 2022.
